## Mr. Impossible

Philippe Starck with Eugeni Quiliet

A most inviting chair with an organic design that inspires comfort, neatness and style.

Mr. Impossible is the combination of sophisticated design and advanced processing plastic processing design. It takes on a new technological challenge with highly sophisticated processing techniques that consist in the welding of two shells: the transparent structure and the seat, in a full-coloured and translucent version, are joined together making them indestructible and guarantee a truly surprising design effect. The seal of the two oval shells gives the plastic a new bi-colour and three-dimensional effect because it welds a transparent and a coloured surface together without interruption, revolutionising the perception of the material which becomes rich and hyper-technological.
